

COTTON DEFOLIANT

RAISING A NEW STANDARD FOR EASY DEFOLIATION.

All too often, cotton growers have traded convenience for performance in their defoliation programs. Choosing among a bewildering array of specialized products was simply the price to pay for consistent defoliation.

Now, however, growers can enjoy convenience and performance in one easy-to-use product. ADIOS™ Cotton Defoliant is the easy new standard in cotton defoliants. Smart growers are switching to the ease of ADIOS, which takes the guesswork out of defoliation. ADIOS does everything a grower expects from a defoliant, regardless of the variety or environmental conditions.

No wonder ADIOS is considered the new standard for easy cotton defoliation.

PROVEN MODE OF ACTION, INNOVATIVE FORMULATION.

ADIOS combines two familiar active ingredients, thidiazuron and diuron, for consistent performance. The water-based, suspension-concentrate formulation is unlike any other defoliant on the market. Proven chemistry and a novel formulation add up to defoliation that you demand at a competitive price.

EASY RESULTS.

ADIOS works quickly and consistently across a wide range of crop and environmental conditions, so harvest is fast and easy.

FLEXIBILITY.

Nothing could be simpler than relying on one defoliant. ADIOS is easy to handle and apply, and it can easily be tank-mixed with other ethephon-based materials to address specific field conditions.

HARVEST SCHEDULING.

Time is of the essence when harvest rolls around. Because ADIOS keeps harvest on schedule, growers make the most efficient use of their equipment, and the crop is at the gin before the weather turns bad.

RE-GROWTH CONTROL.

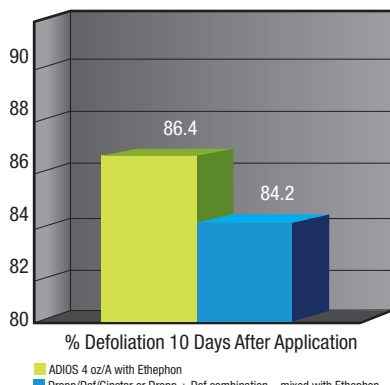

ADIOS provides superior re-growth control for a cleaner harvest and higher grades at the gin. Growers can target mature growth without worrying about later re-growth forcing them to treat again.

RAISING THE STANDARD.

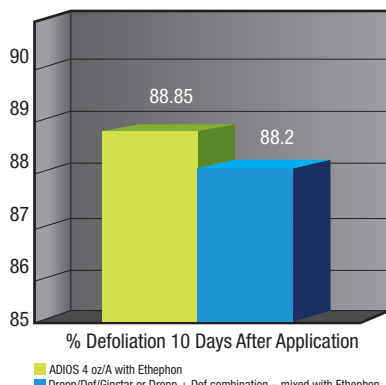

ADIOS has been put to the test across the Cotton Belt, and it consistently delivers the benefits that growers expect:

- Dependable performance across multiple environments
- No adverse reaction to added adjuvants
- Exceptional tank-mix flexibility
- Less time cleaning spray equipment
- Consistent defoliation at a good value

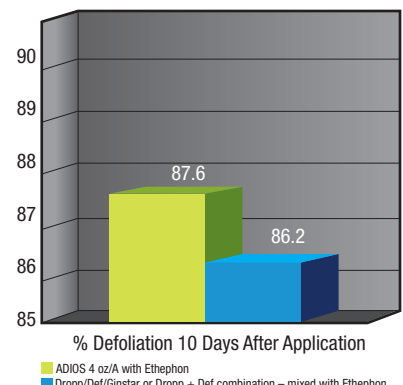

2006 Data from 30 Consultant Commercial Grown Cotton Fields and University Replicated Trials Across the Cotton Belt Comparing ADIOS versus Area Standard

2007 Data from 41 Consultant Commercial Grown Cotton Fields and University Replicated Trials Across the Cotton Belt Comparing ADIOS versus Area Standard

2006 and 2007 Combined Data from 71 Consultant Commercial Grown Cotton Fields and University Replicated Trials Across the Cotton Belt Comparing ADIOS versus Area Standard

COTTON DEFOLIANT

APPLICATION PROCEDURES.

Application rate and timing should match field history and weather forecast, along with past experiences with other defoliant.

TIMING.

ADIOS applications are to be made only on mature cotton plants when the uppermost harvestable boll is mature. Make applications of ADIOS at least 5 days prior to expected harvest date.

RATES.

- Before harvest, use 6.4 – 16 fl oz (0.4 – 1.0 pt) active ingredient per acre.
- One gallon of ADIOS will treat 8 – 20 acres. The maximum annual use rate of ADIOS is 16 oz/A per season.

APPLICATION INFORMATION.

Use an adequate volume of water with the recommended amount of ADIOS to uniformly and completely cover leaves. Maintain agitation during application.

Ground application: Apply 10 – 25 gal/A

Aerial application: Apply 2 – 10 gal/A

MIXING INSTRUCTIONS.

1. Fill spray applicator tank with at least one half of the water to be used.
2. Start agitation.
3. Add other ethephon-based materials (if applicable).
4. Add the appropriate volume of ADIOS.
5. Continue agitation and fill tank with the remainder of the water to be used.
6. Agitation should continue throughout the application.

TANK-MIXING.

With its unique formulation, ADIOS was designed for tank-mixing with your favorite boll opener, for a complete harvest management tool. ADIOS offers superior compatibility:

Flash™
Prep™, Ethephon 6, Boll'd
CottonQuik®/FirstPick™
Finish® 6 Pro

CONDITIONS.

ADIOS can be applied in most weather conditions, both warm and cool.
