

PLANT GROWTH  
REGULATOR

# Consistent Performance. Less Bulk.

Arysta LifeScience is changing the way growers and applicators view Mepiquat Chloride applications for their cotton crops. Introducing a new revolutionary patented WSG (Water Soluble Granule) formulation for the 2010 growing season.

Mepiquat Chloride has been in existence for 30 years, and is proven technology. PIX WSG simplifies application by reducing the amount of product handled, and the number of containers used, which reduces disposal. One pound of PIX WSG is equivalent to 2.5 gallons of Mepichlor 4.2%!

With a patented formulation, PIX WSG mixes easily and has been confirmed through three years of testing to be as efficacious as Mepichlor 4.2%.

## BENEFITS

### Convenient, Clean, Environmentally Friendly:

- Less product to handle (1lb = 2.5 gal)
- Fewer containers for use and disposal
- Ease of mixing
- Pour and go

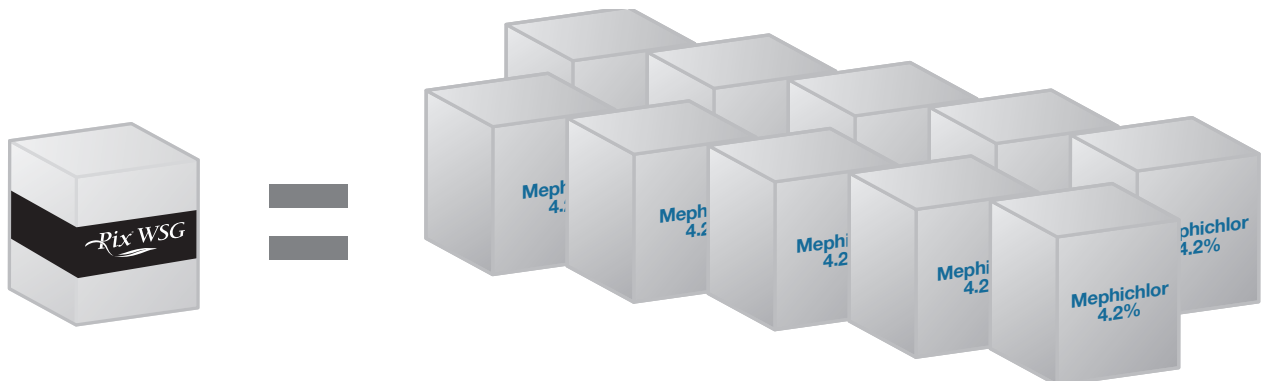

### Consistent Performance:

- Higher yields over Mepiquat alone
- More bolls per plant
- Earlier maturity= better harvestability

### Efficacious:

- 3 years of testing in cotton belt
- Proven results

The same performance of liquid Mepichlor 4.2%, but with less product to use.  
One Case of PIX WSG = 10 Cases of Liquid Mepichlor

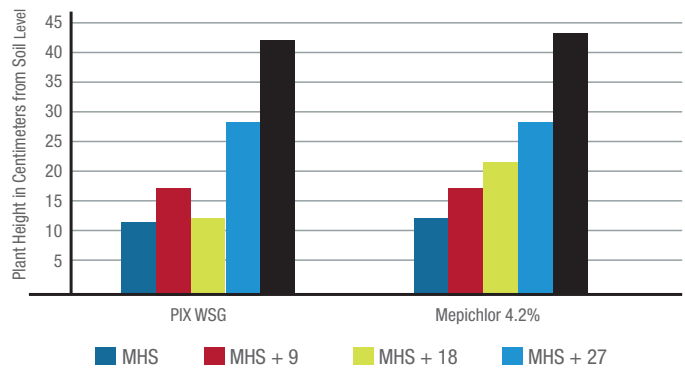

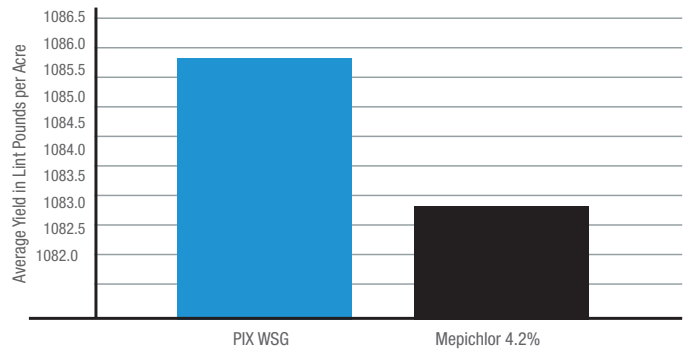

PLANT GROWTH REGULATOR

### 3 Year Average Plant Height

### 3 Year Average Yield per Acre

MEPICHLOR 4.2% RATE	PIX WSG RATE	1 LB TREATS
4 LIQUID oz	0.2 DRY oz	80.00 ACRES
8 LIQUID oz	0.4 DRY oz	40.00 ACRES
12 LIQUID oz	0.6 DRY oz	26.60 ACRES
16 LIQUID oz	0.8 DRY oz	20.00 ACRES

**Usage Conversion**

Number of Acres x Liquid Use Rate / 20.4563 = Total Dry Ounces (Ex: 160 Acres x 10 oz (liquid) / 20.4563 = 78.2 ounces)
